About

I'm a full stack web developer looking to improve upon my skills and have a constructive impact in my future role. I'm able to build single page applications with responsive web designs and connect them to RESTful servers. As a graduate from a web development career accelerator I've furthered my learning on my own by building out projects. I look to surpass what is expected of me and deliver impressive, quality work in a reasonable timeframe.

Skills

- HTML5
- JavaScript
- TypeScript
- Python
- Node
- Django
- Docker
- SASS/SCSS
- jQuery

Experience

Frontend Developer Intern, Motaword
NY, NY

April 2019 – Present

- Assisting in the conversion of Motaword's frontend client to an SPA.
- Decrease website load time by replacing HTML, JavaScript, and PHP files with React components.
- Connect components to Motaword's API through their existing Redux structure.

Freelance Web Developer
NY, NY

March 2018 – Present

- Meet with clients to determine their needs.
- Use modern web technologies to build out sites or incorporate changes in existing sites.
- Assist in registering a domain and deploying the application.

Education

General Assembly – Web Development Immersive – Certificate of Completion

General Assembly's Web Development Immersive is a 12-week long training program dedicated to preparing students to think like engineers and approach problems creatively to build the next generation of web applications and digital products. Graduated February 28th, 2018.
